

Philly Shipyard ASA (OSE: PHLIY) Q1 2019 Results

6 May 2019

Key Events

- ✓ On 28 March 2019, Philly Shipyard delivered the second vessel (Hull 030) in the two-containership order for Matson
- ✓ Philly Shipyard idled its remaining shipbuilding operations and continued to impose layoffs due to the lack of new orders after the Matson project
- ✓ Despite the potential distraction of these activities, there were no recordable injuries in Q1 2019
- ✓ On 6 February 2019, a temporary conditional waiver of the minimum employment condition under the Shipyard Lease was obtained from the Philadelphia Shipyard Development Corporation (PSDC)
- ✓ On 14 February 2019, a new four-year collective bargaining agreement was ratified by the Philadelphia Metal Trades Council (PMTC)
- ✓ On 18 February 2019, Philly Shipyard received a liquidating distribution totaling USD 44.6 million from Philly Tankers
- ✓ First quarter 2019 operating revenues and other income of USD 18.9 million, compared to USD 43.0 million in the same period in 2018
- ✓ First quarter 2019 EBITDA of negative USD 1.5 million, compared to negative USD 1.2 million in the same period in 2018
- ✓ First quarter 2019 net loss of USD 3.4 million, compared to net loss of USD 3.5 million in the same period in 2018
- ✓ Total cash and cash equivalents of USD 72.6 million at 31 March 2019, excluding USD 61.8 million of restricted cash

Operations and Shipping Investments

Vessel Construction

Hull 030 (named *Kaimana Hila*) was delivered to Matson on 28 March 2019. This vessel and its sister ship, Hull 029 (named *Daniel K. Inouye*), which was delivered to Matson on 31 October 2018, are the largest containerships ever built in the United States.

This order was placed in November 2013. Hull 030 was delivered within days of the date targeted for delivery by Philly Shipyard in the revised forecast set over three year ago in Q3 2015. During the construction period, Philly Shipyard took steps to mitigate the potential “last ship effect” (i.e., operational inefficiencies for completion of the last remaining vessel in the order backlog). These steps contributed to the margin improvement included in the Q1 2019 financial results.

During Q1 2019, Philly Shipyard continued to adjust its operations and workforce in line with its order backlog. Currently, there is no shipbuilding activity at the shipyard and all production facilities are idle and both graving docks are empty. Today, Philly Shipyard’s workforce (including direct employees and subcontracted personnel) totals slightly less than 100 people, down from approximately 1,200 people at the beginning of 2018. Philly Shipyard plans to keep a core group of employees to focus on efforts to secure new orders and transition the shipyard into a mix of commercial and government work.

The Company has initiated various cost saving initiatives to preserve its cash. Until pre-production activities related to a potential new shipbuilding project start, Philly Shipyard expects to maintain a cash burn rate of approximately USD 1.5-1.7 million per month on average (excluding any impact from short-term work). A majority of this cash covers the cost of the core group of employees to be retained to secure new work and

convert the shipyard into a compliant government contractor. This cash also covers SG&A related to these efforts and fixed costs such as real estate taxes, utilities and insurance.

On 6 February 2019, a temporary conditional waiver of the minimum employment condition under the Shipyard Lease was obtained from Philadelphia Shipyard Development Corporation (PSDC). The waiver period extends until 31 December 2019. If Philly Shipyard obtains a new order during this waiver period, the waiver of the minimum employment condition will continue until Philly Shipyard reaches the 200 full-time employee requirement. Additionally, on 14 February 2019, a new four-year collective bargaining agreement (CBA) was ratified by the Philadelphia Metal Trades Council (PMTTC), which represents the ten unions at the shipyard. This new labor contract will extend until 31 January 2023. The temporary conditional waiver and new labor contract are critical pieces to support potential new shipbuilding projects in the future. The Board recognizes and appreciates the strong support and cooperation provided by PSDC, PMTC and the unions during this period of uncertainty.

Shipping Investments

During Q1 2019, Philly Tankers, a Jones Act shipping company that was majority-owned by Philly Shipyard, completed an orderly liquidation process for the purpose of distributing its available cash balances to its shareholders. These liquidating distributions totaled approximately USD 83.1 million (including Philly Shipyard's share of USD 44.6 million) and were made on 18 February 2019. Including these distributions, the dividends paid by Philly Tankers to its shareholders total USD 161.2 million (including Philly Shipyard's share of USD 86.6 million).

Health, Safety, Security and Environment (HSSE)

Philly Shipyard's 12-month trailing average for its Lost Time Incident Frequency Rate (LTIFR), as defined by the Occupational Safety and Health Administration (OSHA), at the end of Q1 2019 was 0.14 compared to 0.82 at the end of Q1 2018. Philly Shipyard's 12-month trailing average for its other Recordable Incident Frequency Rate, based on recordable incidents (other than lost time incidents) per 200,000 hours, at the end of Q1 2019 was 2.75 compared to 4.19 at the end of Q1 2018. Given the difficult circumstances, including the potential distraction of pending layoffs, delivering Hull 030 without any recordable injuries in Q1 2019 was a significant achievement. Philly Shipyard continues to work proactively to further improve safety and reduce the number of incidents at the shipyard.

Financial Information

First Quarter 2019 Results

Operating revenues and other income for the first quarter of 2019 were USD 18.9 million compared to operating revenues and other income of USD 43.0 million for the first quarter of 2018. Q1 2019 operating revenues and other income were driven by the remaining progress on the second Matson vessel (Hull 030), whereas Q1 2018 operating revenues and other income were driven mainly by the continued progress on the two Matson vessels (Hulls 029-030). Q1 2018 operating revenues and other income were also partially impacted by the implementation of the new International Financial Reporting Standards (IFRS) 15 standard leading to a reduction in both accumulated revenue and cost of USD 38.4 million in Q1 2018 and recognition of these amounts as an opening equity adjustment at IFRS 15 implementation date of 1 January 2018.

Net loss for Q1 2019 was USD 3.4 million compared to net loss of USD 3.5 million for Q1 2018. The net loss for Q1 2019 was driven primarily by USD 4.3 million of under-recovered overhead costs (i.e., overhead costs incurred and not allocated to projects), offset partially by a USD 1.5 million margin improvement recognized on the Matson vessels. The net loss for Q1 2018 was driven by significantly lower under-recovered overhead costs and was unaffected by a breakeven margin recognized on the Matson vessels.

EBITDA, defined as earnings before interest, taxes, depreciation and amortization, is considered a relevant earnings indicator for Philly Shipyard as it measures the operational performance of the shipyard.

EBITDA for the first quarter of 2019 was negative USD 1.5 million compared to EBITDA of negative USD 1.2 million in the first quarter of 2018. The decrease in EBITDA was mainly driven by the significant under-recovered overhead costs (i.e., overhead costs incurred and not allocated to projects), offset partially by a margin improvement of USD 1.5 million recognized in Q1 2019 on the Matson vessels.

Net financial items in Q1 2019 was expense of USD 0.1 million compared to expense of USD 0.3 million in Q1 2018.

Statement of Financial Position

Total assets were USD 183.0 million at 31 March 2019 compared to USD 190.0 million at 31 December 2018. Total interest-bearing debt was USD 59.7 million at 31 March 2019 compared to USD 59.6 million at 31 December 2018. The Welcome Fund loan, which matures in March 2020, was reclassified from long-term debt to short-term debt.

Cash and cash equivalents (excluding restricted cash) were USD 72.6 million at 31 March 2019 compared to USD 49.6 million at 31 December 2018. The increase of USD 23.0 million was primarily due to the liquidation of the equity-accounted investments in Philly Tankers of USD 44.6 million offset slightly by a net increase of USD 17.2 million of restricted cash of which (a) USD 13.1 million was deposited into an escrow account to secure the Welcome Fund loan, (b) USD 4.4 million was deposited into escrow accounts established as holdbacks for guarantees, deficiencies and disputed items for Hull 030, and (c) USD 0.3 million was released from similar escrow accounts for Hull 029. The Welcome Fund restricted cash deposit was required by the Welcome Fund lender in connection with the liquidation of Philly Tankers. The Matson restricted cash deposits were required by Matson as holdbacks in connection with the deliveries of Hulls 029 and 030.

Restricted cash as of 31 March 2019 amounted to USD 61.8 million, of which USD 52.9 million is related to the Welcome Fund loan, which is expected to be used for repayment of the Welcome Fund loan at its maturity in March 2020, USD 4.5 million is related to holdbacks for guarantees, deficiencies and disputed items for Hull 029 and USD 4.4 million is related to similar holdbacks for Hull 030. The entire restricted cash amount was reclassified from a long-term asset to a short-term asset at 31 March 2019. For further details on the Welcome Fund loan, see note 8.

Right-of-use assets in the amount of USD 14.3 million at 31 March 2019 represents the net book value of the assets PSDC purchased from Philly Shipyard in 2011. These assets were reclassified from property, plant and equipment to right-of-use assets per the new IFRS 16 lease standard (IFRS 16), which took effect 1 January 2019. For further details on IFRS 16, see note 4.

Total equity decreased to USD 108.1 million at 31 March 2019 from USD 111.5 million at 31 December 2018 due to the net loss of USD 3.4 million.

Financing

The Company has a secured five-year term loan for up to USD 60.0 million from PIDC Regional Center, LP XXXI through the Welcome Fund loan program. The loan matures in March 2020. The entire USD 60.0 million amount was drawn under this facility as of 31 March 2019.

The Company also had an unsecured three-year revolving credit facility for up to USD 10.0 million from TD Bank, N.A. The facility terminated in April 2019. USD 0.7 million of this facility was utilized as of 31 March 2019 for the issuance of letters of credit. This exposure was fully cash-collateralized in connection with the termination of the facility.

Shareholder Distributions

Due to the current main focus on securing new orders, the PHLI Board has decided not to pay any further ordinary or extraordinary dividends at this time. The PHLI Board will revisit the Company's dividend policy and dividend plan when it has more clarity about the Company's new order situation and related capital requirements.

Outlook**Shipbuilding**

As of 31 March 2019, Philly Shipyard had no order backlog. Philly Shipyard delivered Hull 030 to Matson during the first quarter of 2019. Securing contracts for new vessels is the key to unlocking Philly Shipyard's potential for sustained operations and profitability. Due to the under-recovery of overhead costs (i.e., overhead costs incurred and not allocated to projects), Philly Shipyard expects it will continue to incur losses in 2019, even if the shipyard receives orders for new vessels. Barring any impact from new orders, it is expected these losses (at an EBITDA level) should be in line with the cash burn rate.

In the near term, Philly Shipyard's main focus continues to be the pursuit of the opportunity to build National Security Multi-Mission Vessels (NSMV). The NSMV program seeks to replace as many as five of the aging vessels that serve as training ships for the state maritime academies in the United States. The U.S. Maritime Administration (MARAD) released a request for proposal (RFP) for a vessel construction manager (VCM) for the NSMV program. The VCM contract was originally expected to be awarded within Q1 2019. However, the selection of the VCM is behind schedule. Now, based on MARAD's public testimony, the VCM contract is

expected to be awarded in May 2019. The VCM will then enter into a contract with a U.S. shipyard to build the vessels. Due to the delay in the VCM selection process, the shipyard contract is now expected to be awarded in Q3 2019, several months later than previously contemplated. The U.S. Congress has appropriated USD 600 million in funding for the first two vessels (i.e., NSMV 1 and NSMV 2). MARAD's stated objective is to receive the lead vessel in time to assure its availability for the summer sea term which commences in May 2022.

Philly Shipyard is engaged in discussions with several interested parties regarding the construction of new product tankers. Even though the market for Jones Act tankers is improving and time charter rates for these vessels are steadily trending upwards, they have not yet risen to a level that will support an acceptable contract price for the shipyard. Accordingly, despite signs of a tightening market and management's optimism on future rate developments, Philly Shipyard believes it is unlikely new product tankers will be ordered in 2019.

In addition, Philly Shipyard is engaged in discussions related to several other potential new construction projects for U.S.-built vessels, including some contracts which could be awarded in 2019, but mainly work for the medium-term and long-term horizons. Among other endeavors, Philly Shipyard is exploring interest from owners in building LNG carriers and vessels for the burgeoning offshore wind industry. Philly Shipyard is also exploring potential partnerships that can enhance its prospects to secure new work into the shipyard and create value for the Company and its shareholders.

Additionally, Philly Shipyard is aggressively pursuing several possibilities for short-term work to have some activity in the shipyard in 2019 before a production start of a potential new shipbuilding project. In particular, Philly Shipyard is pursuing opportunities for steel work and repair, modernization and conversion jobs to utilize idle capacity in its fabrication shops and dry-docks. In support of this, Philly Shipyard has submitted to the U.S. Navy a Master Ship Repair Agreement and is in the process of having its two drydocks certified to Naval Sea Systems Command (NAVSEA) requirements.

Philly Shipyard's strategy and outlook for combining government and commercial work remains unchanged since the 2018 annual report.

Shipping

As part of the process of liquidating Philly Tankers described above, Philly Shipyard has received its liquidating distribution from Philly Tankers, bringing Philly Shipyard's share of total distributions to USD 86.6 million. This caps off an innovative plan for Philly Shipyard to invest in eight Jones Act product tankers with an approximate contract value of USD 1.0 billion through the Philly Shipyard-Crowley joint venture (Hulls 021-024) and Philly Tankers (Hulls 025-028). Going forward, in line with its business strategy, Philly Shipyard will continue to evaluate opportunities to participate in the post-delivery economics of the commercial ships that it constructs.

Risks

Philly Shipyard's revenue is derived primarily from contracts awarded on a project-by-project basis. It is difficult to predict whether or when Philly Shipyard will be awarded a new contract due to, among other things, the complex bidding and selection processes, potential for contract award protests and challenges, changes in existing or forecast market conditions, governmental regulations and uncertainty regarding the timing of budget appropriations. Because Philly Shipyard's revenue is derived from contract awards, the Company's revenues, results of operations and cash flows can fluctuate materially from period to period.

At this time, Philly Shipyard has no order backlog. Philly Shipyard faces significant risks if it is unable to secure new orders and/or financing for major commercial or government shipbuilding programs such as the NSMV program. There can be no assurance that Philly Shipyard will obtain new orders or financing for vessels. Furthermore, even if Philly Shipyard obtains new orders or financing for vessels, none of the possible projects it is presently pursuing alone will fully cover the estimated under-recovered overhead costs (i.e., overhead costs incurred and not allocated to projects) in its 2019 forecast.

The delay Philly Shipyard has experienced in securing new orders and financing has interrupted its building program, resulting in the idling of all production activities in its facility and a decrease of more than 90% of its workforce (including direct employees and subcontracted personnel) since the beginning of 2018. If this delay continues, then it will further interrupt Philly Shipyard's building program and increase the costs and risks faced by Philly Shipyard, including challenges related to attracting and retaining skilled workers and increases in under-recovered overhead costs (i.e., overhead costs incurred and not allocated to projects).

The longer the delay in securing new orders continues, the more expensive and challenging it becomes for Philly Shipyard to win new orders and resume shipbuilding operations. In particular, the extended gap in

production activities increases the risk that the Company is unable to mobilize the shipyard's workforce and retain and raise sufficient capital to support future shipbuilding projects. Moreover, under these circumstances, there is a risk that the going concern assumption will no longer apply for Philly Shipyard and, as such, Philly Shipyard would need to do an impairment charge against its fixed assets. A going concern qualification would make it very challenging to secure new orders and/or financing.

Philly Shipyard depends on unionized labor for construction of vessels. Work stoppages or other labor disturbances could have a material adverse effect on the Company's business, results of operations and financial condition. In order to mitigate this risk, Philly Shipyard has signed a four-year collective bargaining agreement with the Unions which is effective through January 2023. The collective bargaining agreement includes a no-strike clause.

Philly Shipyard's success also depends to a great degree on the abilities of its key management personnel, particularly its executives and other key employees who have significant experience within Philly Shipyard's industry. The loss of the services of one or more of these individuals could adversely affect Philly Shipyard.

Philly Shipyard further depends upon a 99-year lease agreement for the shipyard facility and the future operations of the yard will accordingly be dependent upon Philly Shipyard fulfilling its obligations under this lease agreement. Failure to maintain certain employment levels may result in early termination of this lease. For more details regarding this lease, see note 14.

The Shipyard is dependent upon having access to construction financing facilities and other loans and debt facilities to the extent its own cash flow from operations and milestone payments from customers are insufficient to fund its operations and capital expenditures. In turn, the Shipyard must secure and maintain sufficient equity capital to support construction financing facilities. Additionally, the Shipyard may be required to obtain bonding capacity in case there is need for payment or performance bonds, or to furnish letters of credit, refund guarantees or other forms of security, to support major commercial or government shipbuilding programs such as the NSMV program. Philly Shipyard may not be able to obtain sufficient debt financing or bonding capacity or furnish sufficient security if and when needed with favorable terms, if at all.

In 2019, there has been increased activity to obtain waivers under the Jones Act and legislation to repeal the Jones Act has been proposed. The Company is closely monitoring the situation.

Philly Shipyard's operations historically focused primarily on construction of new vessels for the U.S. Jones Act market. Philly Shipyard is continuing to develop and implement the policies and procedures required to be a fully compliant U.S. Government contractor. Philly Shipyard is aggressively pursuing U.S. Government opportunities for future ship design and construction programs, as well as vessel maintenance, modernization, conversion and repair projects. Entry into, or further development of, lines of business in which the Company has not historically operated may expose Philly Shipyard to business and operational risks that are different from those it has experienced historically. Philly Shipyard's management may not be able to effectively manage these additional risks or implement successful business strategies in new lines of business.

For a further analysis of risks, please refer to the Company's 2018 annual report.

Notes to the condensed interim consolidated financial statements for the 1st quarter 2019

1. Introduction – Philly Shipyard ASA

Philly Shipyard ASA (PHLY) is a company domiciled in Norway. The condensed interim consolidated financial statements for the three-month periods ended 31 March 2019 and 31 March 2018 are comprised of PHLY and its direct and indirect wholly-owned subsidiaries (collectively referred to herein as the Group), including Philly Shipyard, Inc. (PSI).

This interim report has not been subject to audit or review by independent auditors.

The audited consolidated financial statements of PHLY as of and for the year ended 31 December 2018, which include a detailed description of accounting policies and significant estimates, are available at www.phillyshipyard.com.

2. Basis of preparation

These condensed interim consolidated financial statements reflect all adjustments, in the opinion of PHLY's management, that are necessary for a fair presentation of the results of operations for the period presented. Operating results for the three-month period are not necessarily indicative of the results that may be expected for any subsequent quarter or year.

The going concern assumption

The interim consolidated financial statements have been prepared on a going concern basis which contemplates continuity of normal business activities and realization of assets and settlement of liabilities in the normal course of business. The ability of the entity to continue as a going concern is dependent upon continuing shipbuilding operations and securing a customer order. While the Group is actively working on securing new orders, there is inherent uncertainty and no assurance that the Group will successfully secure a customer order.

The following conditions indicate a material uncertainty that may cast a significant doubt on the Group's ability to continue as a going concern:

- The Group does not have contracted customer order backlog. The delay Philly Shipyard has experienced in securing new orders and financing has interrupted its building program, resulting in the idling of all production activities in its facility and a decrease of more than 90% of its workforce (including direct employees and subcontracted personnel) since the beginning of 2018. If this delay continues, then it will further interrupt Philly Shipyard's building program and increase the costs and risks faced by Philly Shipyard, including challenges related to attracting and retaining skilled workers; and increases in under-recovered overhead costs (i.e., overhead costs incurred and not allocated to projects).
- The longer the delay in securing new orders continues, the more expensive and challenging it becomes for Philly Shipyard to resume shipbuilding operations. In particular, the extended gap in production activities increases the risk that the Company is unable to mobilize the shipyard's workforce, and to retain and raise sufficient financing to support future shipbuilding projects.
- Pursuant to the Shipyard Lease between PSI and Philadelphia Shipyard Development Corporation (PSSDC), if PSI fails to maintain an average of at least 200 full-time employees at the shipyard for 90 consecutive days, then the lease term (i.e., a 99-year lease with 79 years remaining including options) is automatically converted to month-to-month and PSSDC has the right to terminate the lease, subject to the right of PSI to complete work-in-process projects and a one-time, limited cure right which allows PSI to restore the lease to a five-year term under certain circumstances. Due to a forecasted breach of this condition caused by the gap in shipbuilding activity following the delivery of Hull 030, which occurred in Q1 2019, Philly Shipyard has obtained a temporary conditional waiver of this minimum employment condition until 31 December 2019. If PSI obtains a new order during this waiver period, the waiver of the minimum employment condition will continue until PSI reaches the 200 full-time employee requirement.

The Group acknowledges the material uncertainty in being able to continue ordinary shipbuilding operations and secure new contracted customer backlog in order to comply with the shipyard lease minimum employment condition without obtaining additional waivers to continue operations beyond 31 December 2019. However, the Directors are confident that this is achievable through a combination of the following:

- Philly Shipyard's main focus is the pursuit of the opportunity to build National Security Multi-Mission Vessels (NSMV). The NSMV program seeks to replace as many as five of the U.S. state maritime academy training ships. The award of this shipyard contract is expected to be announced within Q3 2019 with a delivery of the first vessel targeted within Q2 2022. If PSI is successful in its bid for this NSMV program, the

Group is dependent upon having access to construction financing facilities and other loans and debt facilities to the extent its own cash flow from operations and milestone payments from customers are insufficient to fund its operations and required capital expenditures. Additionally, the Shipyard may be required to obtain bonding capacity in case there is need for payment or performance bonds to support this project. PSI may not be able to obtain sufficient construction financing facilities and other loans and debt facilities, or bonding capacity if and when needed with favorable terms.

- In addition, Philly Shipyard is aggressively pursuing several possibilities for short-term work to have some activity in the shipyard before a production start of a potential new shipbuilding project. In particular, Philly Shipyard is pursuing possibilities for steel work and repair, modernization and conversion jobs to utilize idle capacity in its fabrication shops and dry-docks.
- In the event that Philly Shipyard is in breach of the shipyard lease condition to maintain an average of at least 200 full-time employees at the shipyard for 90 consecutive days, the Group has the intention to request an additional waiver beyond 31 December 2019; however, the success of obtaining this waiver from PSDC is uncertain.

Should the Group be unsuccessful in continuing ordinary shipbuilding operations and securing contracted customer backlog, or unsuccessful in complying with the shipyard lease minimum employment condition without obtaining additional waivers, there is a material uncertainty that exists that may cast significant doubt as to whether the Group will be able to continue as a going concern. In this scenario, the Group may elect to undergo an orderly liquidation process. Therefore, it may be unable to realize its assets and discharge its liabilities in the normal course of business at their stated net book values in the interim consolidated financial statements, resulting in the impairment of property, plant and equipment assets; termination payments relating to PSI's multi-employer union selected pension plan; and the potential acceleration of debt repayments.

Despite the material uncertainties above, the Board's assessment is that it is appropriate to apply the going concern assumption. The Board anticipates that the Group can continue its shipbuilding activities, and will have the financial resources to apply the going concern principle as the basis for the financial statements. The Board's assessment is unchanged from the Board's year-end 2018 assessment included in the 2018 annual report, with no material changes in the assumptions described therein.

3. Statement of compliance

These condensed interim consolidated financial statements have been prepared in accordance with IFRS as adopted by the European Union IAS 34 *Interim Financial Reporting* (IAS 34). They do not include all of the information required for full annual financial statements, and should be read in conjunction with the audited consolidated financial statements of PHLI as of and for the year ended 31 December 2018.

4. Significant accounting principles

The accounting policies applied by PHLI in these condensed interim consolidated financial statements are substantially the same as those applied by PHLI in its audited consolidated financial statements as of and for the year ended 31 December 2018, with the exception of implementation of the IFRS 16 standard described below.

IFRS 16 Leases

IFRS 16 *Leases* (effective from 1 January 2019). The IFRS 16 lease standard (IFRS 16) replaces IAS 17 *Leases* and the related interpretations. The new standard introduces a single, on-balance sheet lease accounting model for lessees, with optional exemptions for short-term leases and leases of low value items. A lessee recognizes a right-of-use asset representing its right to use the underlying asset and a lease liability representing its obligation to make lease payments.

The Company has applied IFRS 16 initially on 1 January 2019, using the modified retrospective approach. Based on this, a potential cumulative effect of adopting IFRS 16 will be recognized as an adjustment to the opening balance of retained earnings as of 1 January 2019, with no restatement of comparative information. There has been no such adjustment of retained earnings as of 1 January 2019, following the implementation of IFRS 16.

As part of the 2011 Authorization Agreement, the Philadelphia Shipyard Development Corporation (PSDC) purchased certain shipyard assets from PSI for a purchase price of USD 42.0 million with funds provided by the Commonwealth of Pennsylvania. PSI leases back those same assets from PSDC subject to the terms of its shipyard lease and the Authorization Agreement. For accounting purposes, the transaction was accounted for as a sale/leaseback, and no adjustments were made to the accounting value of the assets at closing.

The net book value of assets under financial leasing agreements recorded in the statement of financial position at 31 March 2019 amounts to USD 14.3 million. From 1 January 2019, the net book value of the assets PSDC purchased from PSI in 2011 has been reclassified from property, plant and equipment to right-of-use assets.

The operating leases are for facilities, vehicles and printing and copying equipment. These leases consist of smaller amounts for printers and copiers, and leases that are up to 12 months for a training facility and a vehicle. Based on this, and no material impact from these leases, no right-of-use asset or lease liability has been recorded when the new IFRS 16 lease standard was effective 1 January 2019.

The building lease for PSI's plate priming facility has been extended on a month-to-month basis. The base rent is USD 16 thousand per month. This amount is not included in the operating lease rentals recorded above. Due to the short term of the lease, on a month-to-month basis, no right-of-use asset or lease liability has been recorded 1 January 2019. This treatment will be revisited if the shipyard signs a contract or contracts that secures long-term activity.

PSI operates on land leased from PSDC through April 2038. Annual payments under the lease agreement include rent, taxes and operating expenses (operating expenses are subject to an annual revision based on PSDC's operating expenses). PSI has options to renew the lease for three consecutive periods of 20 years each and one final period of 19 years. At expiration of the first lease period in 2018, the lease was renewed for the first of the three 20-year option periods. PSI can acquire the land for USD 1 after the expiration of all renewal periods. Lease payments for rent due under the finance lease are USD 1 per year.

The shipyard lease is treated as a government grant under IAS 20 *Accounting for Government Grants and Disclosure of Government Assistance* (IAS 20). On transition to IFRS 16, the shipyard has continued to use this policy to record the government grant under IAS 20 against the investment. This gives a USD 0 balance for the right-of-use assets and the lease liability at 1 January 2019, as the grant is deducted to arrive at the carrying amount of the right-of-use assets. For more details regarding the shipyard lease, see note 14.

5. Use of estimates

The preparation of condensed interim consolidated financial statements requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

The most significant judgments made by management in preparing these condensed interim consolidated financial statements in applying PHLY's accounting policies, and the key sources of estimation uncertainty, are the same as those that are applied to the audited consolidated financial statements as of and for the year ended 31 December 2018 unless described elsewhere in this report.

Due to the limited backlog to Q1 2019, an impairment trigger has been identified for the carrying amount of property, plant and equipment, the same triggering event as per 31 December 2018. The Company has estimated the recoverable amount using the value-in-use method determined by discounted future cash flows, the same estimated recoverable amount as per 31 December 2018. No impairment of property, plant and equipment balances was recorded in 2018. The key assumption applied in this assessment is dependent on the ability of the Company to successfully obtain shipbuilding contracts (at historically consistent margins) beyond the delivery of Hull 030 in Q1 2019. Whilst the Company is actively working on securing new orders there can be no assurance that Philly Shipyard will successfully obtain new orders. Further details on determination of recoverable amounts and impairment testing can be found in note 8 of the 2018 annual report. Through the end of Q1 2019, no major changes have been identified.

6. Tax estimates

Income tax expense is recognized in each interim period based on the best estimate of the expected annual income tax rates.

7. Share capital and equity

At 31 March 2019 and 31 March 2018, PHLY had 12,107,901 ordinary shares (excluding 466,865 own shares) at a par value of NOK 10 per share. There were no share issuances or repurchases for the quarters ended 31 March 2019 or 31 March 2018. Accordingly, 12,107,901 ordinary shares was used in the calculation of earnings per share for the quarters ended 31 March 2019 and 31 March 2018.

8. Interest-bearing debt

The following shows material changes in interest-bearing debt during 2019:

Amounts in USD millions	Non-current debt	Current debt	Total interest- bearing debt
Balance 31 December 2018	59.6	-	59.6
Repayment of debt	-	-	-
Reclass of debt	(59.6)	59.7	0.1
Balance 31 March 2019	-	59.7	59.7

PSI has a secured term loan of up to USD 60.0 million (USD 59.7 million on the statement of financial position which is the loan amount net of unamortized loan fees) with PIDC Regional Center, LP XXXI, a partnership between CanAm Enterprises and the Philadelphia Industrial Development Corporation (PIDC). The loan has a fixed interest rate of 2.625% per annum through maturity. The loan matures in March 2020. This loan was made through the Welcome Fund loan program, a source of low-cost capital generally available to commercial, retail, industrial and non-profit firms that create significant job growth and are located in or planning to locate to the City of Philadelphia. The loan has a five-year term and is secured by a first lien on USD 52.9 million of cash collateral (including USD 13.1 million of cash collateral deposited in Q1 2019). USD 60.0 million is drawn under this term loan at 31 March 2019.

PSI had an unsecured three-year revolving credit facility for up to USD 10.0 million from TD Bank, N.A. The facility terminated in April 2019. The loan accrued interest at 30-day LIBOR plus 2.50% per annum as defined in the credit agreement. USD 0.7 million of this facility was utilized as of 31 March 2019 for the issuance of letters of credit. This exposure was fully cash-collateralized in connection with the termination of the facility.

9. Related party transactions

Aker Capital AS, a wholly-owned subsidiary of Aker ASA, is the majority shareholder of PHL Y, owning 57.6% of its total outstanding shares as of 31 March 2019. In addition, Kristian Røkke, the Deputy Chairman of the Board of Directors of PHL Y, is a Board member of TRG Holding AS, which owns 66.7% of the total outstanding shares of Aker ASA as of 31 March 2019.

Philly Shipyard has service agreements with Aker ASA and certain of its affiliates which provide specified consulting, tax, financial and administrative services. All payables under these agreements are paid within the normal course of business. Philly Shipyard believes that related party transactions are made on terms equivalent to those that prevail in arm's length transactions.

Related administrative costs and financial statement amounts for the three-month period ending 31 March 2019 were USD 30 thousand (USD 30 thousand for the same period in 2018).

PSI entered into an administrative services agreement with Philly Tankers LLC (PTLLC) whereby PSI supplied certain administrative services to PTLLC. As part of the liquidation of Philly Tankers, this administrative services agreement was assigned by PTLLC to Philly Tankers AS (PTAS) on 31 May 2018 and was terminated on 31 December 2018. Related revenues for the three-month period ending 31 March 2019 were USD 0 (USD 30 thousand for the same period in 2018).

10. Capitalized interest

Amounts in USD millions	Q1	
	2019	2018
Interest expense	(0.4)	(0.4)
Interest capitalized on construction contracts	-	-
Net interest expense	(0.4)	(0.4)

11. Construction contracts

The order backlog is USD 0 at 31 March 2019 as the Matson project is now 100% complete. Order backlog consists of future contract revenues and is subject to adjustment based on change orders as defined in the construction contracts.

Amounts in USD millions	Order backlog 31 Mar. 2019	Order intake 3 months to 31 Mar. 2019	Order backlog 31 Dec. 2018
	-	0.3	17.4

The loss recognized on long-term contracts in process (Hulls 029-030) as of 31 March 2019 is as follows:

Amounts in USD millions	Actual 31 Mar. 2019
Contract revenue recognized to date	408.8
Less: contract expenses recognized to date	(418.3)
Loss recognized to date (Hulls 029-030)	(9.5)

Typical variable consideration elements identified in the Company's contracts with customers include liquidated damages, performance guarantees and warranties. Under the Matson contract for Hulls 029-030, liquidated damages are considered as variable consideration, whereas performance guarantees and warranties are not categorized as variable consideration.

Contract revenue and loss recognized to date includes revenue and loss for Hulls 029-030 since the contract for these vessels is accounted for using the principle-over-time revenue recognition method according to IFRS 15.

As of 31 March 2019, the Company had no more contracts in place. During Q1 2019, the Company was building one containership for Matson: Hull 030 delivered on 28 March 2019. Philly Shipyard recognized contract revenues and expenses for the two-containership order from Matson as one project. As of 31 March 2019, the Matson project is 100% complete. The estimated contract loss was provided for as of Q1 2019.

Customer milestone payments as of 31 March 2019 and 31 December 2018 totaled USD 0 and USD 391.8 million, respectively. Customer milestone payments from Matson are made at intervals that are intended to be cash neutral, and as such are not representative of a significant financing component present in the contract.

Customer advances, net as of 31 March 2019 and 31 December 2018 totaled USD 0 and USD 1.2 million, respectively. As of 31 March 2019, customer advances, net represents the difference between customer advances received from Matson for Hulls 029-030 and costs incurred for those vessels.

As of 31 March 2019, PSI has non-cancellable purchase commitments for materials and equipment (unpaid liabilities) of approximately USD 3.5 million for the construction of Hull 030.

12. Operating revenues and other income

Amounts in USD millions	Q1	
	2019	2018
Operating revenues	18.9	42.9
Profit in equity-accounted investments (Hulls 025-028)	-	0.1
Operating revenues and other income	18.9	43.0

Profit in equity-accounted investments (Hulls 025-028) represents the Company's 53.7% share of the total comprehensive profit of Philly Tankers, which at quarters ending 31 March 2019 and 31 March 2018 amounted to USD 0 and USD 0.1 million, respectively.

13. Financial instruments

As of 31 March 2019, the Company had no forward exchange contracts or other financial instruments.

14. Commitments and contingencies

Pursuant to the shipyard lease between PSI and PSDC, if PSI fails to maintain an average of at least 200 full-time employees at the shipyard for 90 consecutive days, then the lease term (i.e., a 99-year lease with 79 years remaining including options) is automatically converted to month-to-month and PSDC has the right to terminate the lease, subject to the right of PSI to complete work-in-process projects and a one-time,

limited cure right which allows PSI to restore the lease to a five-year term under certain circumstances. Due to a forecasted breach of this condition caused by the gap in shipbuilding activity following the delivery of the last vessel in its order backlog (Hull 030) in Q1 2019, Philly Shipyard has obtained a temporary conditional waiver of this minimum employment condition until 31 December 2019. If PSI obtains a new order during this waiver period, the waiver of the minimum employment condition will continue until PSI reaches the 200 full-time employee requirement.
